

Bill Travis quick summary

Graduated LSUBR 197 BS in Woo Science and Technology

Spent 16 years in the wood products industry 10 years in lumber production (pine sawmills)

6 years in Retail lumber and building material industry with Baton Rouge Lumber Company. At the time BRLC was the largest outlet of lumber and building materials in Louisiana. I worked with everyone from individuals buying materials to build their own home to some of the major General Contractors in Louisiana. I am familiar with issues in construction from forming a slab to trim out at completion. I have served as an expert witness in legal actions involving acceptable materials in manufactured housing

In 1994 I entered the water treatment industry. I currently am involved with the production, treatment and distribution of municipal potable water. Work in the collection and treatment of municipal and industrial waste water. Storm water issues and industrial cooling water are also in the scope of my work.

I've been in Hammond since 1959 and have seen the arrival of the first McDonalds, the mall in it's various forms, one way streets arrive in downtown and the growth from two banks, one office each to a bank on every corner.
