Drainage Notes:

- 1) All water from site flows to the two large canals on the southern and western sides of the property. These canals join just south of the property as shown.
- 2) Phase 2 area is 10.63 Acres. For the drainage calculations, the Phase 1 area and the city of Hammond property is included. All property south of the canals is not included as construction is not planned for these areas. Therefore area modeled for drainage is 11.8 Acres
- 2) As per EBR model the pre-development drainage is 18.8 CFS

RE: Preliminary Subdivision Review
Phoenix Square Subdivision – Phase II
Sec. 26, T6S, R7E (44 lots)

Dear Mr. Taylor:

We reviewed above-referenced PRELIMINARY plans dated 9/29/2015 (revised) for general compliance with city land use, drainage, and utility standards, and offer the following comments:

General

1. Indicate benchmark location, description, and elevation on Final Plat.
2. Operation and Maintenance responsibility should be clearly spelled out on Final Plat.

Drainage:

1. A dry detention pond is proposed. Dedicated access to the pond should be shown.
2. See comment “2.” under “General” above.
3. Sheet “C-3” shows catch basin “D9” outfalling to the Detention Pond; the “Post Development Drainage Plan” sheet shows catch basin “D8” as the outfall CB.
4. The “Drainage Notes” indicates the Detention Pond outlet pipe to be “12 inch” diameter to minimize discharge; the actual drawing shows “18” A2000 outfall pipe” as the Detention Pond outlet pipe.

Streets:

1. No exceptions taken.

Water & Sewer:

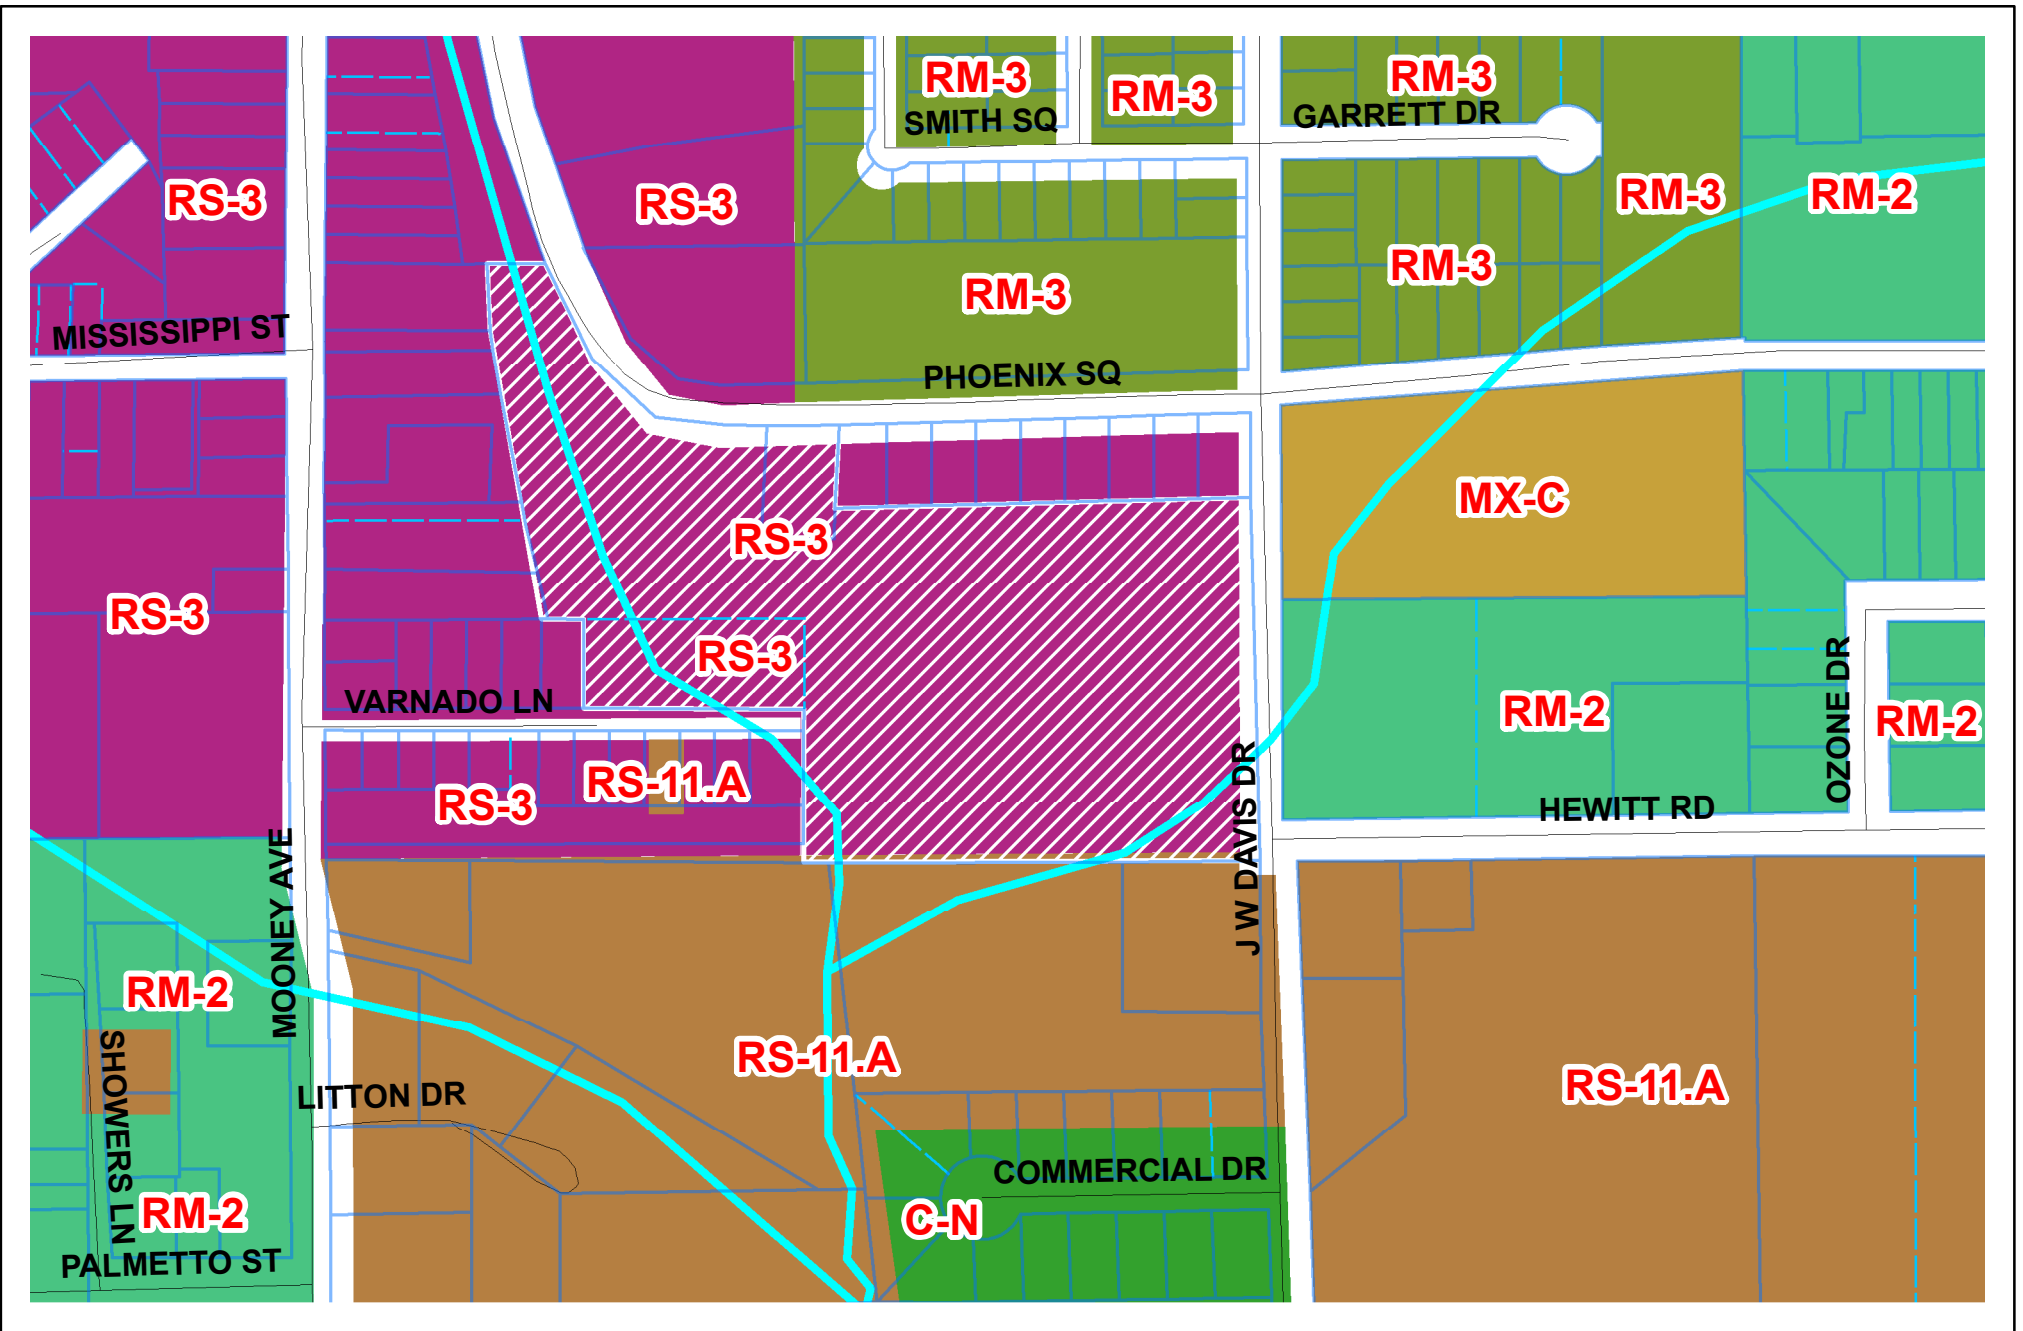

1. The preliminary design as presented is functional.

With the above comments addressed, we recommend approval. If there are any comments or questions, please contact me.

Sincerely,

T. C. Spangler, Jr., P.E.

cc: Mayor Pete Panepinto
Mr. Clay Barrilleaux, P.E.
