ENGINEERS DESCRIPTION, JUSTIFICATION AND ESTIMATED COST OF PROPOSED REVISION (ATTACH ADDITIONAL SHEETS IF NECESSARY)

1. During excavation of the existing runway pavement subgrade multiple stumps and highly organic material was found throughout the project site not shown in the original geotechnical investigation. Observation and additional samples taken by the geotechnical engineer during construction determined that eighteen inches of subgrade removal in lieu of the eight inches specified in the plans and the addition of a geotextile fabric be used in addition to the geogrid specified to provide an adequate subgrade course. The additional excavation resulted in an overrun of project cost. 2. Additive Alternate 3 was removed from the project.
